Summary

Results-driven Full Stack Developer with 3+ years of experience delivering scalable web applications for global clients, including DHL and the Netherlands government. Spearheaded the development of an AI-powered invoice processing system, reducing load times by 30% and improving data accuracy by 25%. Proficient in Vue.js, Django, and Docker, with a proven track record of optimizing performance, streamlining workflows, and mentoring teams to achieve project goals. Passionate about leveraging cutting-edge technologies to solve complex problems and drive business growth.

Professional Experience

Full Stack Developer (Vue.js / Django)

AI DocBuilder, Remote (Toronto, Canada), Jan 2024 – Present

- Led the development of an AI-based invoice processing system, utilizing Vue/Nuxt, Django, and Docker.
- Delivered tailored solutions for clients like the Netherlands government and DHL.
- Managed complex OCR engine data from scanned invoices and integrated AI logic for processing.
- Improved application performance, reducing load times by 30% for large invoice files.
- Implemented best practices and conducted thorough code reviews, resulting in improved code quality and maintainability.

Full stack JavaScript Developer

Gain Solutions, Mirpur-12, Dhaka. Feb 2023 - Dec, 2023

- Enhanced code quality and maintainability by implementing ESLint, Prettier, and Volar tools, resulting in almost 10% reduction in code review times and an overall increase in team productivity.
- As Part of a 4-persons team that rebuilt the SaaS Application project. Used Vue 3 and TypeScript, improved the user experience and documentation, and finished in 3 months.
- Developed new features such as a dynamic Graph and Chart, a user chat module, and a data visualization component using Google Chart, Chart.js, and D3.js
- Utilized Node.js inspector, breakpoints, and browser DevTools to debug and resolve critical errors, enhancing overall application reliability.
- Utilized project management tools like Microsoft Teams, Jira, Slack, Zenhub, and ClickUp to track progress and maintain efficiency.

Frontend Developer (Nuxt.js)

Nextive Solutions, Karwan Bazar, Dhaka. August 2022- Jan, 2023

- Created user-friendly and responsive LMS using Vue.js, Nuxt.js, Vuetify, Vue CLI and others.
- Integrated RESTful APIs to streamline data flow, reducing data retrieval times by 20% and enhancing application performance.
- Mentored and coached a team of 6-7 intern developers, resulting in a 15% improvement in team productivity and code quality.

Jr. Frontend Developer (Vue.js / Nuxt.js)

Developer Experience Hub, Remote, May,2021- August,2022

- Designed and developed web applications using Vue.js and Nuxt.js, achieving a 98% mobile responsiveness score and improving user engagement by 25%.
- Worked with RESTful APIs to integrate data from various sources and ensure smooth functionality.

Key Projects

Kireibd | Ecommerce Site for beauty products | <https://kireibd.com/>

- Developed the frontend for KireiBD, a fully responsive e-commerce platform, using **Vue.js**, **Nuxt.js**, and **Bootstrap 5**.
- Implemented key features such as **product search**, **user authentication**, **dynamic product filtering**, and **payment system integration**.

AI Doc Builder | AI-Powered Document Processing System (Project details are confidential)

- Developed the frontend for AIDocBuilder using Vue.js, Nuxt.js, and Bootstrap 5, incorporating dynamic features like document upload and real-time progress tracking.
- Collaborated with backend teams to integrate **OCR engine data** and **AI logic**, improving data accuracy by 25%.
- Utilized Django, PostgreSQL, Docker, and Redis for backend integration and deployment on RedHat.

Ready Kit | Developer Kit for Management App | <https://readykit.gainhq.com/admin/dashboard>

- Developed a customizable developer kit using Vue 3, TypeScript, and Bootstrap for creating modern management panels.
- Built reusable components like Data table, Calendar, Custom Forms, and Kanban View with features like sorting, filtering, drag-and-drop, and real-time updates.

Education

Cox's Bazar International University | 2021

Bachelors of Science in Computer Science

Cox's Bazar Polytechnic Institute| 2012

Diploma Engineering (Computer Science)

Technical Skills

- **Frontend:** JavaScript, TypeScript, Vue.js 2/3, Nuxt.js 2/3, HTML/CSS, Tailwind CSS, Bootstrap, Vuetify, State Management (Pinia, Vuex), Authentication (JWT, OAuth), WebSocket, WebRTC
- **Backend:** Python, Django, RESTful APIs, PostgreSQL, Redis, NGINX,
- **DevOps & CI/CD :** Docker, GitHub Actions (CI/CD), Git (GitHub/GitLab), NGINX
- **Testing & Debugging:** Unit/Integration Testing (Jest), E2E Testing (Cypress), Browser DevTool, Node.js Inspector

Language

- **English: B2** (Upper-Intermediate – Fluent in written and spoken communication)
- **Hindi: A2** (Pre-Intermediate – Basic conversational skills)
- **Bangla: C2** (Proficient/Native – Fluent in written and spoken communication)
